Codes of the treatment

Check data for NPOC (mg/L)

The following points have a value different than the other data points:

- 2024-06-02 18:00: **T8** and **T11**. These are the same points as the ones Laurel identified.
- 2024-06-03 00:00: **F1, F2, T2, T5, T3** and **T13**. However, that's a lot of points so they might not be outliers.

Check data for TN (mg/L)

For TN, T11 at 2024-06-03 6:00 seems to be a clear outlier. The tanks that were identified as outliers in the NPOC plot above do not appear on the TN plot.
